Washington, June 8.—At 8 o'clock it was reported at the house that there had been no change in General Sheridan's condition since the last bulletin.

Somenset, O., June 8.—Mrs. John Sheri-dan, mother of General P. H. Sheridan, who has been ill for some time, had another relapse yesterday afternoon and is in a critical condition. The doctors fear she can not live. The serious illness of her son Phil has never yet been made known to her for fear of serious results. Constant communication, both by telephone and telegraph is kept up with General Sheri-

of yesterday and made two or three characteristic comments.

At 11 o'clock this morning it was stated that the general's minil had remained perfectly clear. He was resting quietly, with little or no noin, and for the time being, his condition was slightly improved. The organic disease from which he suffers, however, remains unyielding. He was more or less delirious all through the night; not violently though, for he was too weak for that, but he could not recognize members of the family or physicians, and refused to take medicine or nourishment. About 5 o'clock this morning his mind cleared and he readily took milk. The medicine was given hypodermically. Each of the several attacks which he has had lately left him much weaker than previous. His rallies have been but partially satisfactory, and altogether the case is most desperate. From information received from high sources it is believed the end is not far off.

Hugoron, Kan., June 8.—Yesterday the citizens of this town were greatly surprised and much agitated when Ed Short, James Garrond, F. E. Sirclecomb and one Wm.

Houseley, of Woodsdale, rode into our

town for the purpose of murdering our citizens in cold blood. We have recently had a hot contest over a railroad bond election for two lines of railroad, one through the north part of the county and the other through the south part, which would leave the center of the county without any line of road. Of course the county seat opposed these bonds only by fair and honorable means, and the election resulted in the defeat of the notorious "Sam Wood scheme" to hoist these bonds on the county. This man Short had said f they failed to carry the bonds he would see that Hugoton was burned to ashes. Of course all this looks as though sanc-tioned by Wood, who is the leader in all the litigation the county has ever had.

Therefore, yesterday Short and his gang came in town. The people here were not alarmed or suspicious of their appearance, presuming they had come here on legitimate business, and of course they were hospitably treated. Finally Short got on his horse and rode up in front of the city marshal's office, to Samuel Robinson, city marshal of this place, and commenced firing without notice or warning. Mr. Robinson defended himself gallantly, and in the meantime, Garrond was in the rear of the building to catch Robinson if he attempted to escape out of the rear end of the building; also Housley was near the Harris house with horses ready to escape. This, it is plain to be seen, was all pre-

The Republicans are well satisfied with the result of the Democrate convention, and their universal comment is that the Democracy has arranged for its own defeat. Ohio Republicans admit that Thurman will gather around him z few more votes than the ticket would have received otherwise; but the additional strength will not be sufficient to change the result. Ohio's Republican majority will be as big as ever, and with a Cleveland and Thurman ticket and a hybrid platform they believe the Democrats are doomed to disaster and defeat.

Could the recorded experience of thousands of workers be voiced the verdict would be that Hos tetter's Stomach Bitters renews failing strength, stimulates the jaded mental powers to fresh activity, and relaxes undue nervous tension as nothing else does. Digestion, a regular habit of body, appetite and sleep are promoted by it, and it is an admirable auxillary in the recovery of health by convalescents. A fastidious stomach is not offended by it, and to persons of both sexes in delicate health who occasionally feel the need of an efficient tonic, the whole range of the pharmacocia and the catalogue of proprietary medicines does not present a more useful, safer or more decisive one. Both men arose and went toward in crop prospects. The outlook as to cereals improves steadily, so that there is now reason to hope for a large yield of all grain except wheat, and for a yield of wheat exceeding 20,000,000 bushels or more, the estimate of a month ago, provided the weather continues fairly favorable.

The men arose and went toward the front door. When within ten feet of it the tramps began firing through the glass window. Ketchum fell, shot in four places, two balls entering his abdomen, one in his breast and one in the left shoulder. For twenty two years, and even longer, Mr. Bergh has devoted his energy and wealth to the amelioration of the condi-tion of the dumb creation. Since that time he has seen the modest society which he founded, and of which he is still the president, become one of the strongest benevolent organizations, not only in this city, but in America, for there is now hardly a state in the Union which does not contain a kindred organization. In thirty-saven states and territories laws forbidcoast are exceptionally numerous still, there being no less than forty-two failures reported there during the week, which is far above the average.

seven states and territories laws forbidding the fill treatment of animals have been passed, and in thirty-four of them societies to carry out their provisions have societies to carry out their provisions have been organized. Canada, Mexico, Cuba and several South American countries have aided the good work by organizing societies, and the passage of laws is cer-tain to follow. Very few men have ever-lived to see the work which they started grow to such coloseal proportions, and there is no other reformer now living who has witnessed the spread of his ideas over

so vast a territory .- Benjamin Northrop Scarcity of Buffalo Robes

Much has been written about the ter-rible loss of life in the northwest during the blizzard being due to the scarcity of buffalo robes, which contribute the only defense against the rigors of that country. It is true that a buffalo robe or coat is now beyond the reach of those with flender purses, and it is true that for cer tain purposes the buffulo hide and fur are superior to any others. This leads me to the suggestion that if some of the great cattle kings of the west would give up raising cattle and go into buffalo farming they would find it an immensely profitable business. Not only would every hide obtainable find a ready sale, but the meat would find a market in the cities, and the refuse of the carcass could be made into the dozen articles of profitable commerce that the steer now affords. -Globe-Democrat.
